

# Toilets

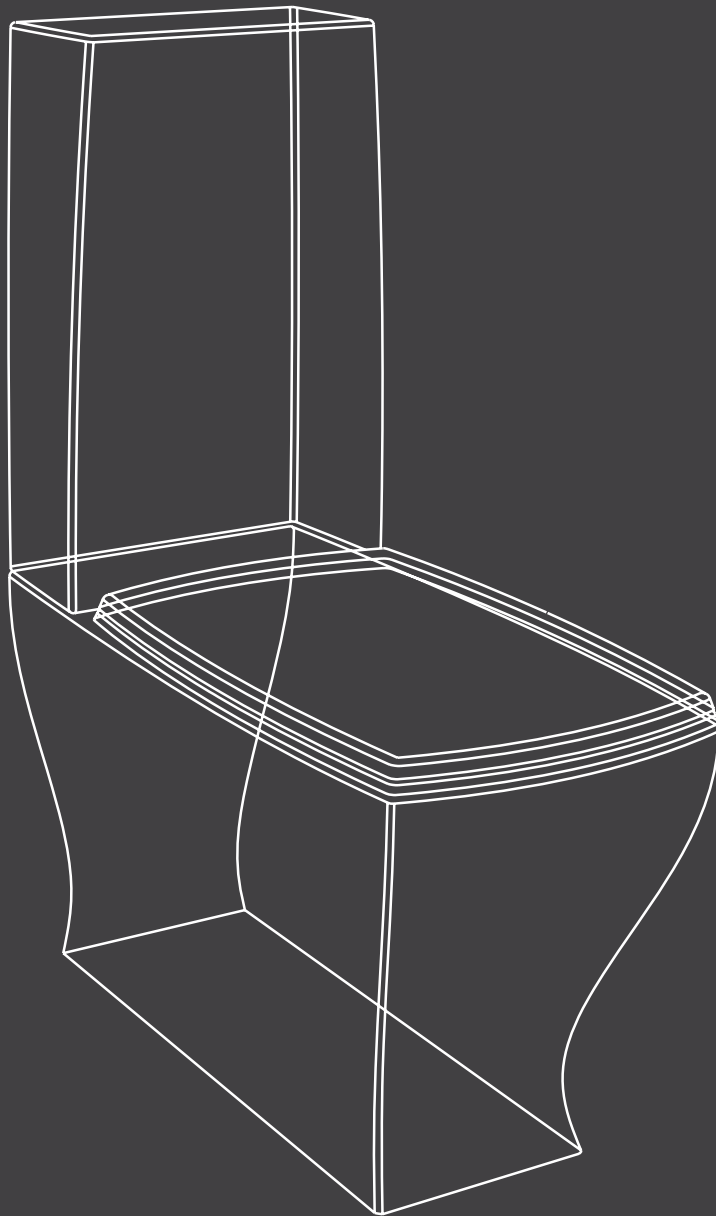

Jazz by ArtCeram puts a modern twist on the classic bathroom. This retro bathroom design by Meneghello Paoletti Associati features cool, contemporary details complementing retro silhouettes for a trendy yet timeless look. Whether your style preferences tend toward the traditional or the ultra-modern, the Jazz bathrooms offer something for every taste.

# Understanding the different toilet types and features

## 1. Back to Wall Close Coupled Toilet Suite

The back-to-wall close coupled toilet suite adds a streamlined, modern look to any bathroom. Positioned flush with the wall, there is no gap behind and all waste and inlet pipes are concealed, with the cistern then positioned above the bowl.

## 2. Close Coupled Toilet Suite

The close coupled suite has the cistern fitted against the wall and the pan is positioned away from the wall. The gap between the wall and the pan varies according to the model.

## 3. Back to Wall Toilet Pan

The back-to-wall toilet pan has an in-wall cistern and a fully concealed waste which hides exposed pipes. The back-to-wall pan runs all the way to the wall and is easy to clean with smooth, seamless lines.

## 4. Wall Hung Toilet Pan

The wall-hung toilet is mounted to a bracket in the wall. It takes up less space than a traditional unit and with an in-wall cistern, provides a clean, uncluttered appearance.

## S trap or P trap?

### P Trap

The term P trap indicates that the outlet (waste) pipe goes through the wall.

### S Trap

The term S trap indicates that the outlet (waste) pipe goes through the floor.

**NOTE:** Your choice of S or P trap will depend on availability of access through the floor or wall.

## Toilet Seats

### Soft Close Seats

The Soft Close automatic closure system finally puts an end to noisy closing WC seats. Just a fingertip touch and the lid closes all by itself, gently and silently.

### Quick Release Seats

Quick-Release functionality allows the seat to be removed easily from the toilet for cleaning.
